

PREPARED FOR YOUR RECORDS

Your written plan, quoted to the tooth.

This is a specimen of the document a patient leaves a Lo Smiles consultation with. It shows the kind of entries a real plan carries — named materials, FDI tooth numbers, published prices and the warranty — using a placeholder patient. No real patient, case number, lot number or date appears on it.

PATIENT	CASE NO.	PLAN DATE
— (Specimen)	—	—
LEAD CLINICIAN	UK CONSULTATION	TREATMENT
Dr Behsat Ayyildiz	Manchester · Belfast	Antalya · 5-7 days

WORKED EXAMPLE · TOOTH BY TOOTH (FDI NUMBERING)

Illustrative entries only — the shape a real schedule takes. FDI two-digit notation: first digit is the quadrant (1 upper-right, 2 upper-left, 3 lower-left, 4 lower-right), second digit the tooth from the midline.

FDI	TOOTH	PLANNED WORK	MATERIAL OF RECORD
11	Upper-right central incisor	Laminate veneer	Ivoclar IPS e.max · lot no. —
21	Upper-left central incisor	Laminate veneer	Ivoclar IPS e.max · lot no. —
22	Upper-left lateral incisor	Crown	Zirconium dioxide · lot no. —
36	Lower-left first molar	Implant + crown	Hiossen titanium implant · lot no. —
46	Lower-right first molar	Implant + crown	Hiossen titanium implant · lot no. —

Shade recorded on the plan as a VITA Classical reference (e.g. A2, B1) so the lab and your UK dentist read the same number.

Each implant fixture and ceramic batch is written against its own lot number on the real plan; shown here as a placeholder.
